PROFILE OF RECENT PROJECTS

Project Name	HRSO (Human Resource Service Operation)
Client	Xerox
Role	UI Architect and Solution
Environment	Angular, Node, Java, RWD

Project Description

HRSO is Xerox prime product to support organization employee Health and Life insurance need. Its working as integrated service portal for employee to get organization benefit and external option to enhance their need.

Responsibilities

- UI support and component development
- Core component development which will integrated in all product solution
- UI page implementation with Angular
- UI architect support for any new module on product
- UI R&D for best solution and practice

Project Name	Manage Payee (Smartphone redesign payee module)
Client	TD Bank
Role	UI Development and Solution
Environment	Angular, Cordova
Platform	Android, IOS

Project Description

Manage Payee is one of main module on TD bank Smartphone redesign project which enables user to add/manage payee for Canada and USA payee. It's a new capability which added on mobile platform, previously user needs to visit easy web. This module makes TD's client more easy and flexible way to get TD payee service.

Responsibilities

- UI support and component development
- UI page implementation with Angular and cordova
- UI bug fixing

Project Name	PFAF (Pre-filled Application Flow)
Client	TD Bank

Role	UI Solution and Team Member
Environment	Java and Dojo

Project Description

PFAF module is TD bank online sales application's one module which enables user to purchase PFAF product like GIC etc. online. Previously user needs to visit branch to get those product. This module makes TD's client more easy and flexible way to get TD.

Responsibilities

- UI support and component development
- UI page implementation with Dojo and JSP
- UI bug fixing

Project Name	MRDC (Mobile Remote Deposit Cheque)
Client	TD Bank
Role	UI Solution and Team Member
Environment	Android and XML

Project Description

MRDC is TD bank client application for TD bank's smart phone user. This application is giving more feasibility of client to access TD bank app and perform Cheque deposit remotely without visiting the branch or drop box through their phone. Currently this app is developing on iOS and Android native platform.

Responsibilities

- UI component Skin development
- UI page implementation on XML
- UI bug fixing

Project Name	Smart Phone Redesign
Client	TD Bank
Role	UI Architect and Team Member
Environment	Android and XML

Project Description

Smart Phone Redesign is TD bank client application for TD bank's smart phone user. This application is giving more feasibility of client to access TD bank app and perform daily banking work through their phone. Currently this app is developing on iOS and Android native platform.

Responsibilities

- UI ExtJS component development
- UI feasibility analysis and architecture for UI navigation
- Web Development using HTML , CSS, JavaScript (Sencha ExtJS)
- Client requirement gathering and feasibility analysis

Project Name	JPMC Chase
Client	JP Morgan
Role	Application Architect and Developer
Environment	HTML5, CSS3, JavaScript, jQuery, Bootstrap, Angular JS, Responsive Web Design, Java, Less/SASS

Project Description

JPMC chase is online portal for assets management system, which help JPMC to manage its client's assets and agent management. JPMC chase have 15 modules and we have to develop all modules in latest technology stack to make application more usable and accessible with various devices like mobile, tablet and desktop.

Responsibilities

- Application UI architect and solution development
- UI standards and documentation
- Responsive Web compatibility
- Web Development using HTML , CSS, JavaScript (Angular js and Bootstrap)

Project Name	CInvest
Client	Wells forgo and Scripps
Role	Application Architect and Developer
Environment	HTML5, CSS3, JavaScript, jQuery, Bootstrap, Angular JS, Responsive Web Design, SCSS, AJAX

Project Description

CInvest is Cognizant component library, which is developed for supporting multiple projects and based on Responsive web Development architecture. This component library builds on RWD atomic rules for component and fully tested in all major devices. This lib builds upon bootstrap 3 and LESS. We have to develop all components in latest technology stack to make application more usable and accessible with various devices like mobile, tablet and desktop.

Responsibilities

- Application UI architect and solution development
- UI standards and documentation
- Responsive Web compatibility
- Web Development using HTML , CSS, JavaScript (Angular js and Bootstrap)

Project Name	Firmenich-Flexible SOW
Client	Firmenich SA
Role	UI Tech lead
Environment	Ext-JS, Groovy, GSP, Object Oriented JavaScript, jQuery, HTML DOM, CSS

Project Description

Firmenich FKP portal is internal portal for Firmenich which used for flavor management and its growth analysis. This portal is used by Firmenich employee and Firmenich client across globe. This project is related to maintenance of Firmenich FKP portal, where we have to handle business requirement and enhance existing feature of portal based on business need.

Responsibilities

- ExtJS component development
- Application UI screen development and documentation
- Client requirement gathering and feasibility analysis based on framework
- AJAX and back end service integration

Project Name	Firmenich - FKP Enhancements
Client	Firmenich SA
Role	UI Tech lead
Environment	Ext-JS, Groovy, GSP, Object Oriented JavaScript, jQuery, HTML DOM, CSS

Project Description

Firmenich FKP portal is internal portal for Firmenich which used for flavor management and its growth analysis. This portal is used by Firmenich employee and Firmenich client across globe. FKP- Enhancements is used as Wikipedia for Firmenich various product and provide the comparable analysis of their product in various market.

Responsibilities

- ExtJS component development
- Application UI screen development and documentation
- Client requirement gathering and feasibility analysis based on framework
- Ajax and back end service integration

Project Name	PICF
Client	PlanetSoft
Role	UI team lead
Environment	GXT, JAVA, JSP, GQuery, Object Oriented JavaScript, XHTML, HTML DOM, CSS

Project Description

PICF is a PlanetSoft Integrated Component Library, which supports different available product of PlanetSoft. It is a complete configurable and reusable component library which is base of different product and application.

Responsibilities

- UI Component library development
- Table less HTML prototype and CSS development
- Based on requirement design the work flow, interact with other team
- Providing UI support to development
- Handling various UI issue in application

Project Name	TPP (The Policy Processor)
Client	MNYL [India], Manulife [USA], Sun life [USA]
Role	Team member
Environment	PICF, JAVA, JSP, JQuery, Object Oriented JavaScript, HTML, HTML DOM, CSS, Oracle/MSSQL

Project Description

TPP is a PlanetSoft Main product, which is support Life Insurance industries. It is a leading application in Insurance industries, which help to process the new policy and Underwriting work. It is tested in IBM lab and we get the 100% fast response without any UI issue in performance. TPP have the 80-20 configuration feasibility.

Responsibilities

- Implement the JQuery functionality and support
- Table less HTML prototype and CSS development
- Based on requirement design the work flow, interact with other team
- Providing UI support to development
- Handling various UI issue in application

Project Name	PSS (Producer Support System)
Client	SBIL [India], Manulife [USA], ING [USA], ICICIPro[India]
Role	Team member
Environment	PICF, TPP, JAVA, JSP, JQuery, Object Oriented JavaScript, HTML, HTML DOM, CSS, Oracle/MSSQL

Project Description

PSS is a second PlanetSoft product, which is support Life Insurance industries. It is a leading application in Insurance industries for Producer (Agent) related issue, which handled all Producer related work and help to company grow like agent appointment, commission calculation, branch hierarchy etc. It is tested in IBM lab and we get the 100% fast response without any UI issue in performance. PSS have the 60-40 configuration feasibility.

Responsibilities

- Implement the JQuery functionality and support
- Table less HTML prototype and CSS development
- Based on requirement design the work flow, interact with other team
- Providing UI support to development
- Handling various UI issue in application

Project Name	CLAIMS
Client	MNYL [India]
Role	Team member
Environment	PICF, TPP, JAVA, JSP, JQuery, Object Oriented JavaScript, HTML, HTML DOM, CSS, Oracle/MSSQL

Project Description

CLAIMS is a PlanetSoft product, which is support Life Insurance industries claims related issue. It is a leading online application in Insurance industries for claims calculation and settlement. It is tested in IBM lab and we get the 100% fast response without any UI issue in performance. PSS have the 60-40 configuration feasibility.

Responsibilities

- Implement the JQuery functionality and support
- Table less HTML prototype and CSS development
- Based on requirement design the work flow, interact with other team
- Providing UI support to development
- Handling various UI issue in application

Project Name	MapVersa
Client	Annova Technology
Role	Team member
Environment	PHP, Object Oriented JavaScript, HTML DOM, CSS, Post-GRE SQL database

Project Description

The objective of this project is to develop full-fledged web based software for Annova Technology pvt. Ltd. in which we provide fully dynamic logic for GIS based place utilization. In this software we provide web services based classed to implemented other to connect directly to us and used our according to their requirement. This web based also help the user to find their location and location related information. In this software we used centralized database which has ground level information for many Indian cities. The interface is to be very user friendly and could be operated by a common individual.

Responsibilities

- Searching Module development
- Map file for Maps development
- Logic development for the map scale and embedding images in map
- Design user interface
- Design the Cartography of the map

Project Name	Gis-Golf
Client	iGolf, USA
Role	Team member
Environment	SVG, Illustrator, HTML, JavaScript, CSS

Project Description

The objective of this project is to develop full-fledged software for igolf company’s visual device which help the golf players while practice to manage or calculate the distance of target point through GIS (Global information system). The interface is to be very user friendly and could be operated by a common individual.

Responsibilities

- Design and Development of the patterns using Illustrator (SVG) and interface using html
- Functionality development using JavaScript.

Project Name	Fleet Management System
Client	Trans Discovery, Chennai
Role	Team member
Environment	PHP, JavaScript, HTML, DHTML, CSS, Post-GRE Sql

Project Description

The objective of this project is to develop full-fledged software for tracing transport vehicle through using GIS technology. Provision is given to restrict access to information using password and different levels of access are provided. Day / Weekly / Yearly reports of

vehicle running received, issued sessions were also to be provided. The interface is to be very user friendly and could be operated by a common individual.

Responsibilities

- Design forms, reports and interface of the page
- Functionally Development for reports and forms interface

Project Name	iMAPS
Client	Annova Technology Pvt.Ltd., Vishakhapatnam
Role	Team member
Environment	PHP, JavaScript, HTML, DHTML, CSS, Post-GRE Sql

Project Description

The objective of this project is to develop full-fledged software for finding and exploring the area through map and GIS technology. This software developed for targeting some specific area of company and also provides facility to modify for any user of based on their requirement. The interface is to be very user friendly and could be operated by a common individual.

Responsibilities

- Development Design Front page, Menus, interfaces of the Pages
- Functionally Development for Menus, buttons and forms interface
